

High & Mighty Sealer

Base Coat for High & Mighty

High & Mighty Sealer is applied to floors prior to applying *High & Mighty*. *High & Mighty Sealer* serves four primary purposes.

- *High & Mighty Sealer* eliminates the need for multiple coats of *High & Mighty* in circumstances where the flooring material is very porous.
- *High & Mighty Sealer* can increase the gloss and DOI of one coat of *High & Mighty*.
- *High & Mighty Sealer* will simplify and speed up the *High & Mighty* removal process.
- *High & Mighty Sealer* improves the “per square foot” coverage ratio of *High & Mighty*.

Materials Needed:

- High & Mighty Sealer
- Micro-fiber mop base, pole, and 24 inch flat micro-fiber applicator.

Application Process:

Before applying *High & Mighty Sealer*, complete all steps of the Floor Preparation Procedures.

1. Attach a *flat micro-fiber applicator* to a micro-fiber mop base.
2. Pour approximately 6-8 ounces of the *High & Mighty Sealer* directly onto the floor.
3. Set the applicator mop into this puddle to soak it.
4. Using a “figure 8” motion, spread the *High & Mighty Sealer* evenly across the floor. *High & Mighty Sealer* will initially leave a white film when wet, but should not be left in puddles or streaks.
5. Continue by pouring approximately 4-6 ounces of the *High & Mighty Sealer* directly onto the floor.
6. Use the “figure 8” motion to spread the sealer, and make sure to coat 100% of the floor (including edges, corners, etc.)
7. Always move the micro-fiber applicator in one direction to keep any dirt and debris from being left on the floor surface.
8. Repeat steps 5 and 6 until the entire floor has been sealed.
9. Allow the floor to dry. Typically this will take approximately 10-15 minutes.
10. Apply additional coats of *High & Mighty Sealer* until it attains a dull shine. Once it shines (when dry), there is enough sealer to roll *High & Mighty*.
11. When the final coat of *High & Mighty Sealer* is free of a “tacky” feel, the floor is ready to be rolled with *High & Mighty*.

Please Note:

- One gallon of *High & Mighty Sealer* covers approximately 1500 square feet.
- There will be no waste with this product because it does not have a pot life and can be used at multiple job sites. Simply cover the container when you are finished.
- Do not use *High & Mighty Sealer* on terrazzo, concrete or wood floors.
- Do not allow the sealer-filled micro-fiber applicator to dry. If the micro-fiber applicator dries out before it is completely washed out, the mop will no longer be useable. Seal the micro-fiber mop in a plastic bag until it can be laundered.
